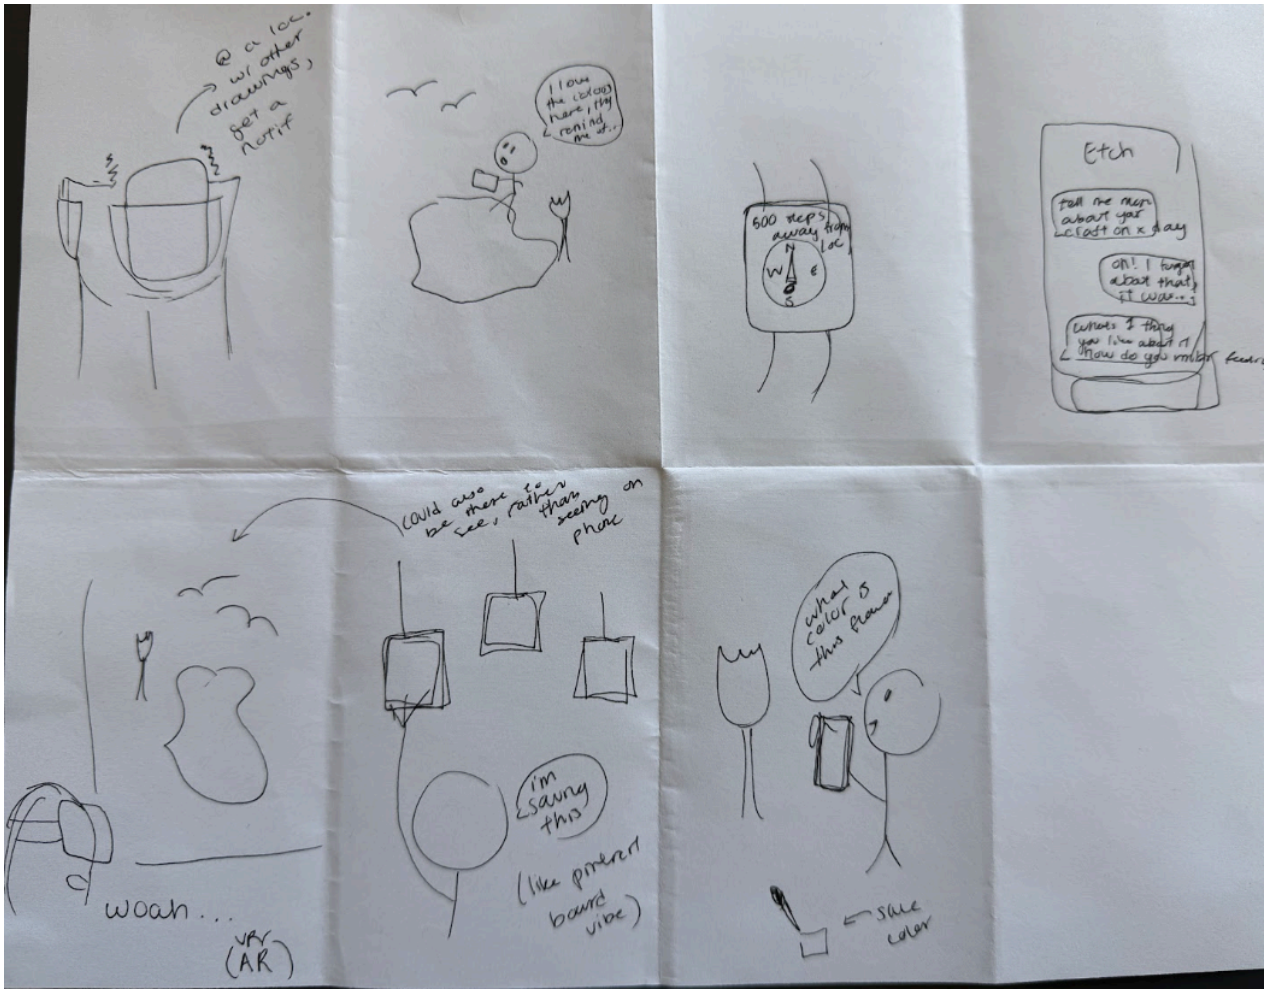
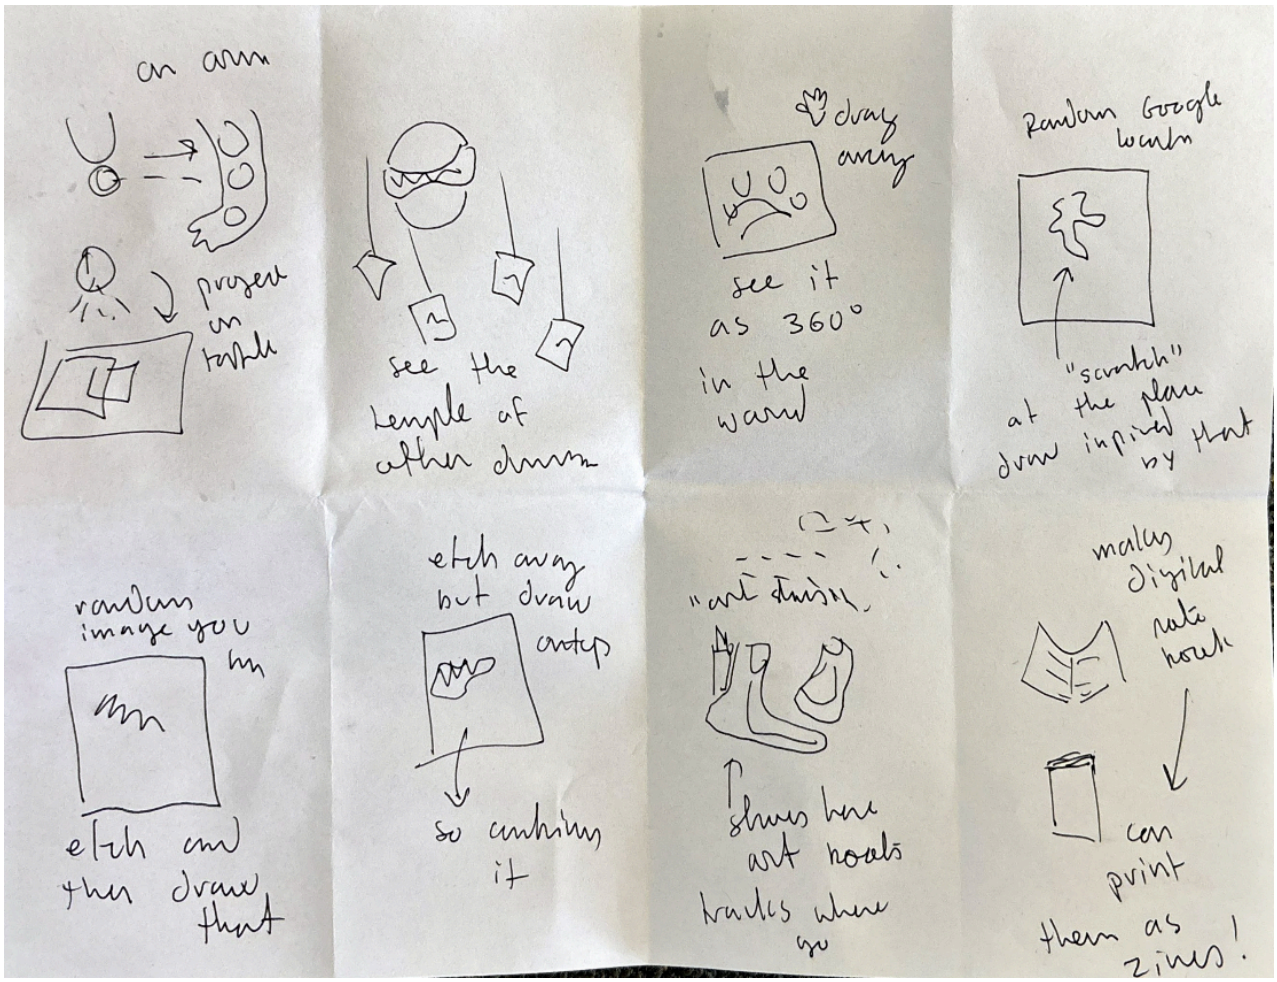
Our value

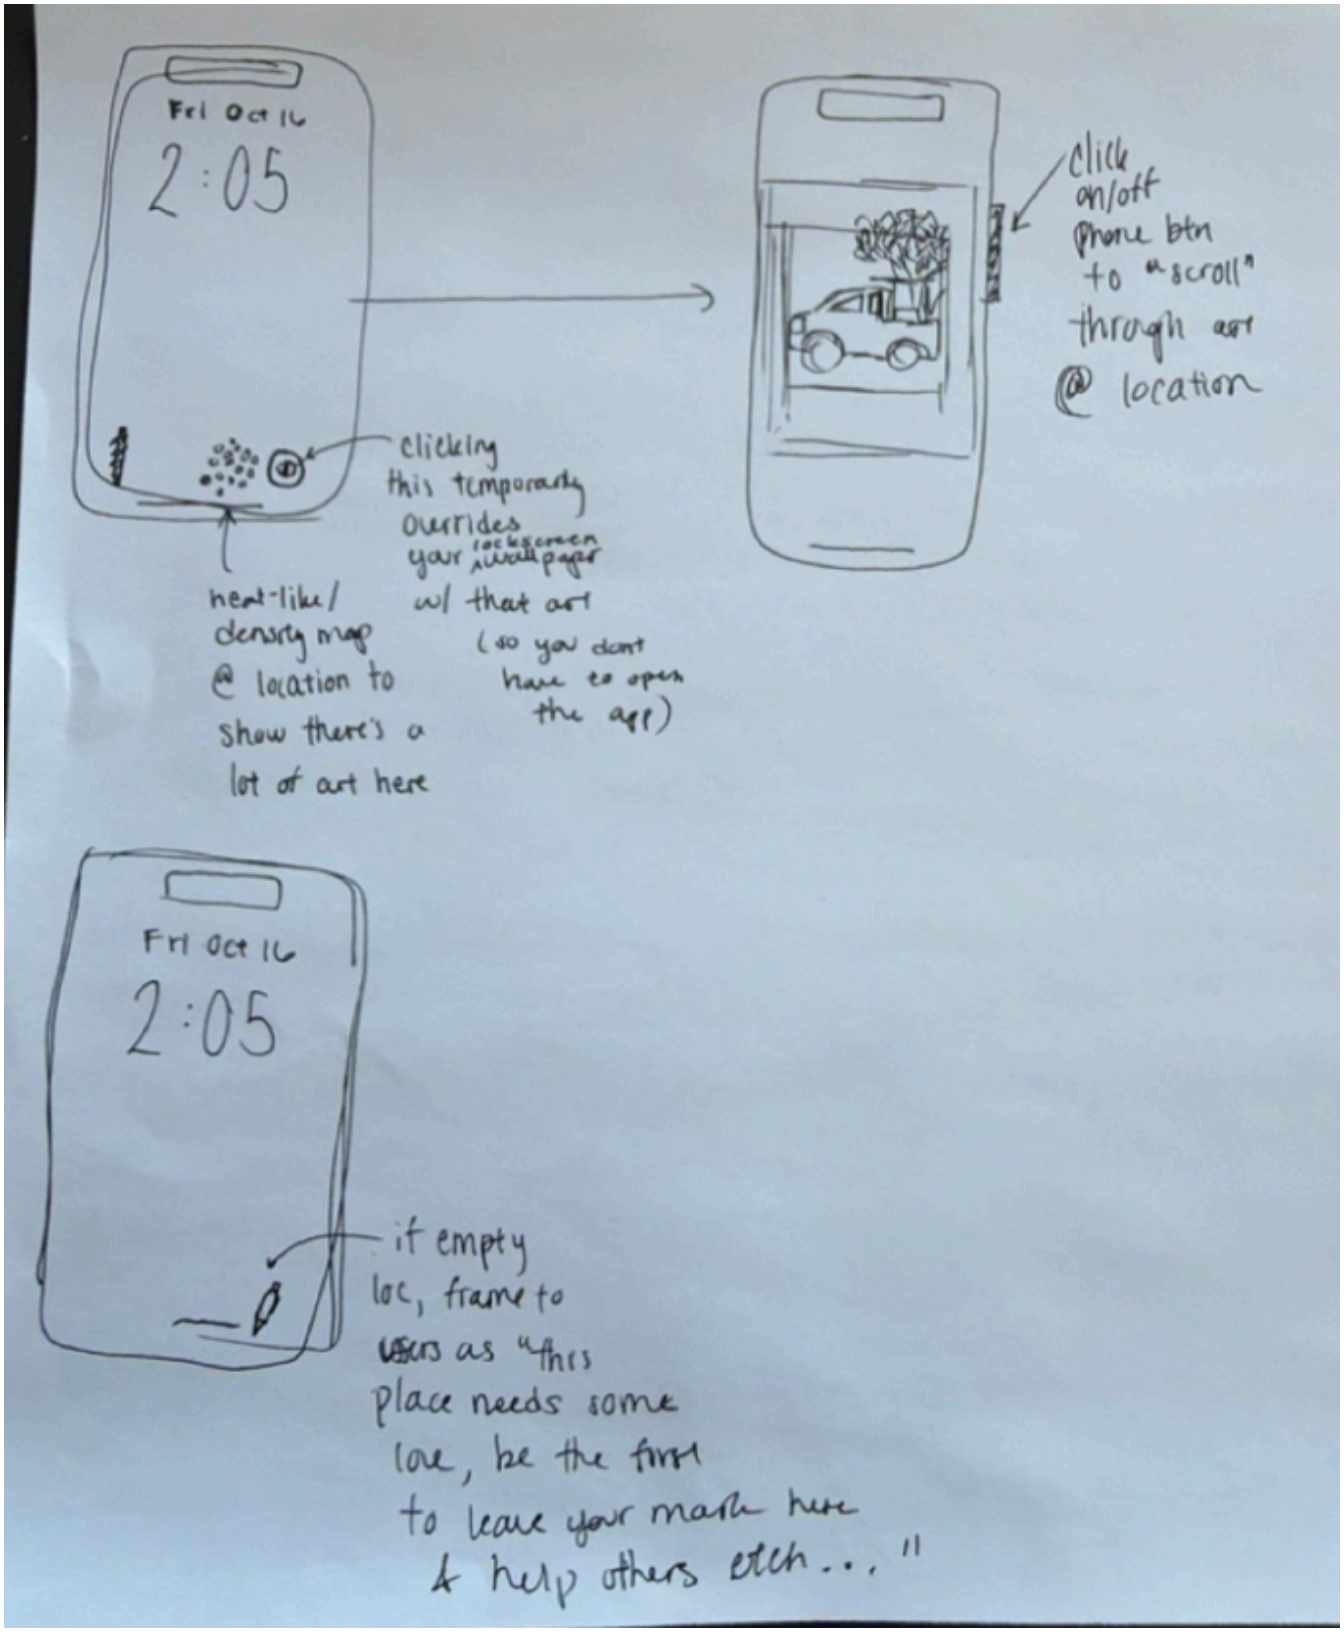
Make creativity **feel like an adventure** through **low-pressure** art-making that helps people rediscover inspiration during **creative burnout**

Concept Sketches
(Solution Idea Sketches)





on arm
project on table
see the temple of other drum
draw away
see it as 360° in the world
Random Google words
"scratch" at the place draw inspired by that
random image you in
etch and then draw that
etch away but draw onto
so confusing it
"art finish"
shows how art travels where
make digital note book
can print them as zines!



Fri Oct 16
2:05
clicking this temporarily overrides your lockscreen wallpaper w/ that art (so you dont have to open the app)
heat-like/ density map @ location to show there's a lot of art here
click on/off phone btn to "scroll" through art @ location

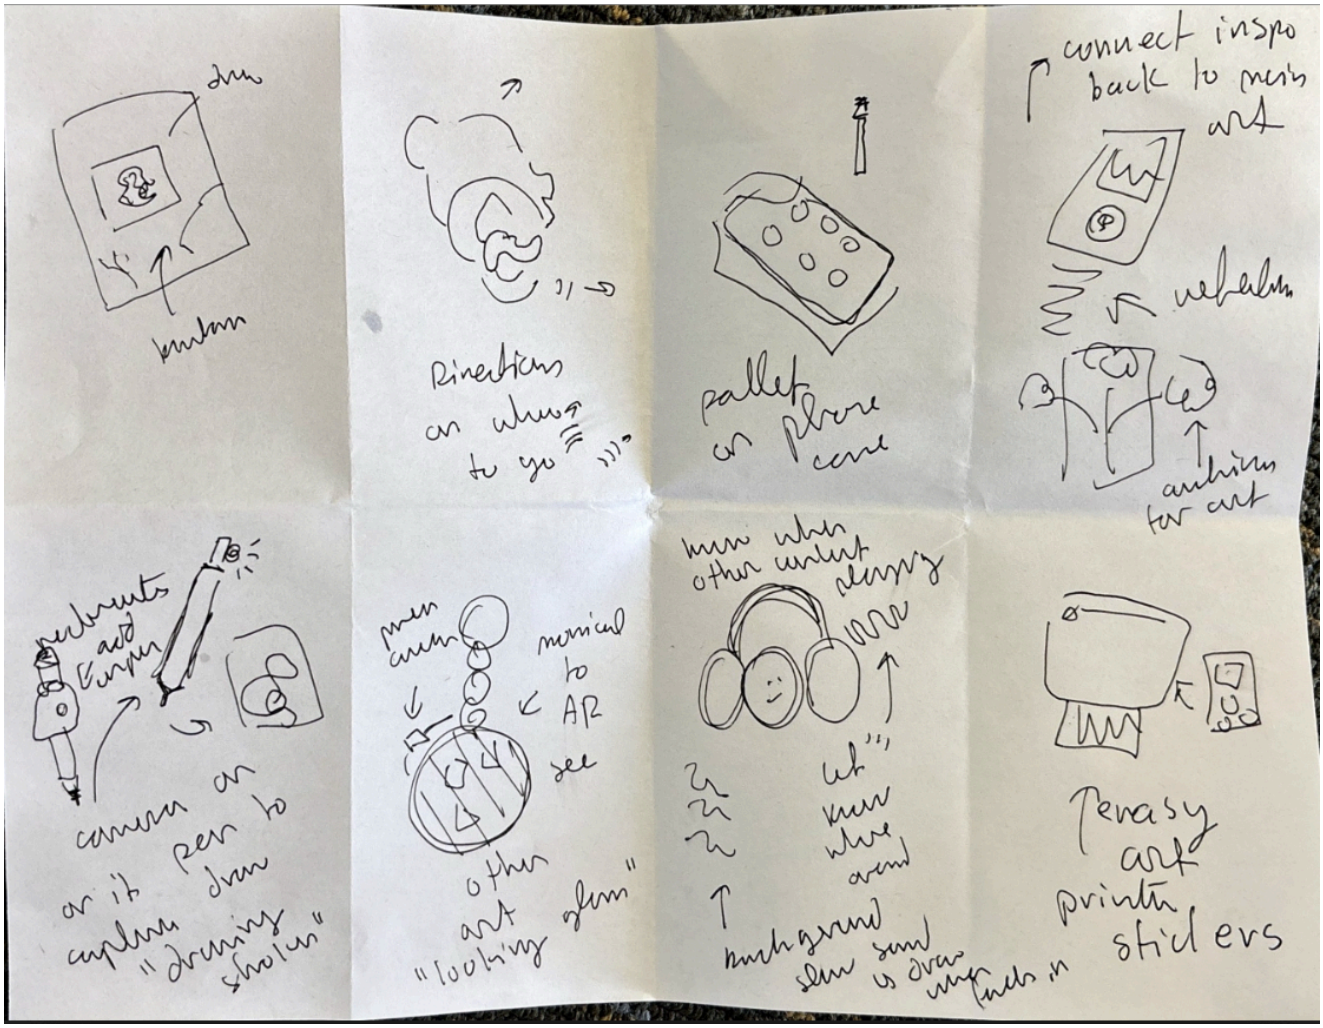
catch
- take a breather, stare, maybe a cat-spotting
getting close to a nice spot gives you a ping recommendation.
can't draw right now? take photo & use speech to describe what you see.
catch
in a rush? you can draw on your smartwatch also
(what do you see?
look for an animal
draw something in motion
More?
stuck while at a spot? get inspiring prompts
Bring your bigger craft with you outdoors.
AR: visualize your art in a new environment with new themes
1)
2)
3)
focus on one object to draw at a time, then go next
clicker when you walk by a cool location, it marks that spot on the app for you to come back to.



connect inspo back to mesh art

Sketch
N
W
E
S
user has option to explore/discover or sketch
User using compass to find closest art nearby
watch vibrates, letting user know they're arrived
User sees some cool ring complete animation & then an eye to tap on & see the art
User can save art if they like it so they can return to it for inspo as they walk around
art appears on apple watch
(user must be in x radius of where art was originally made)
as user walks around, art changes based on location

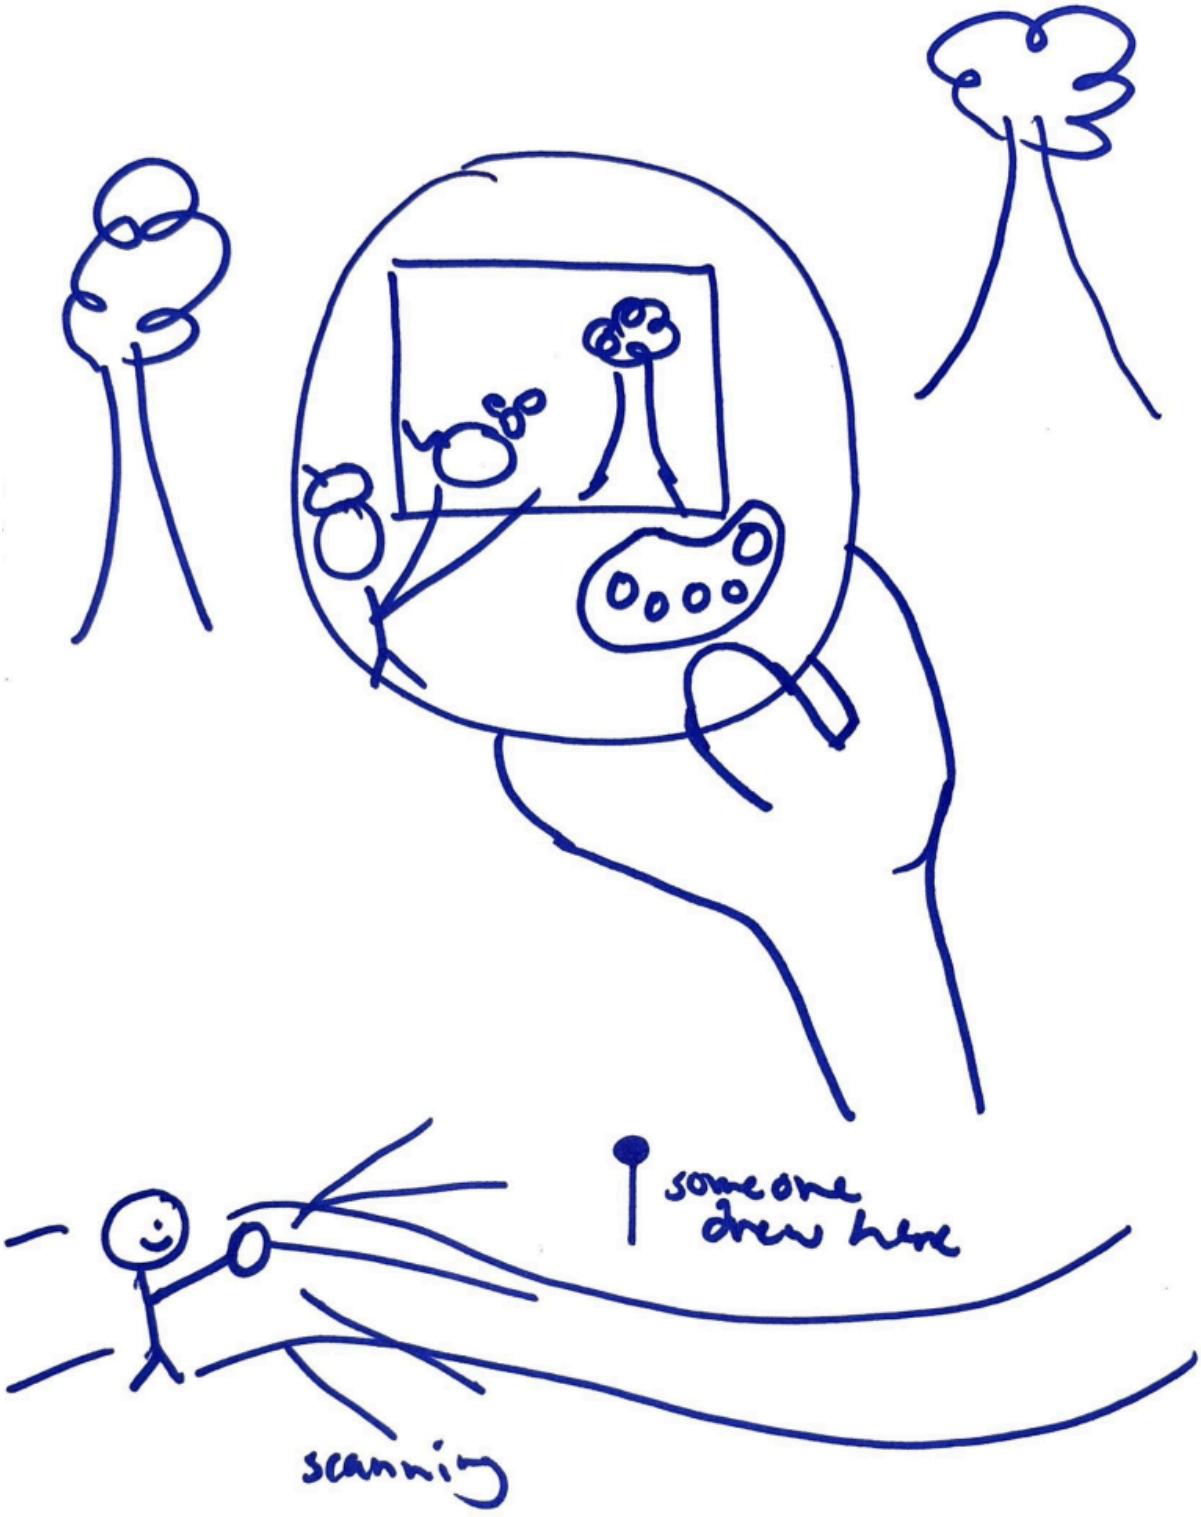
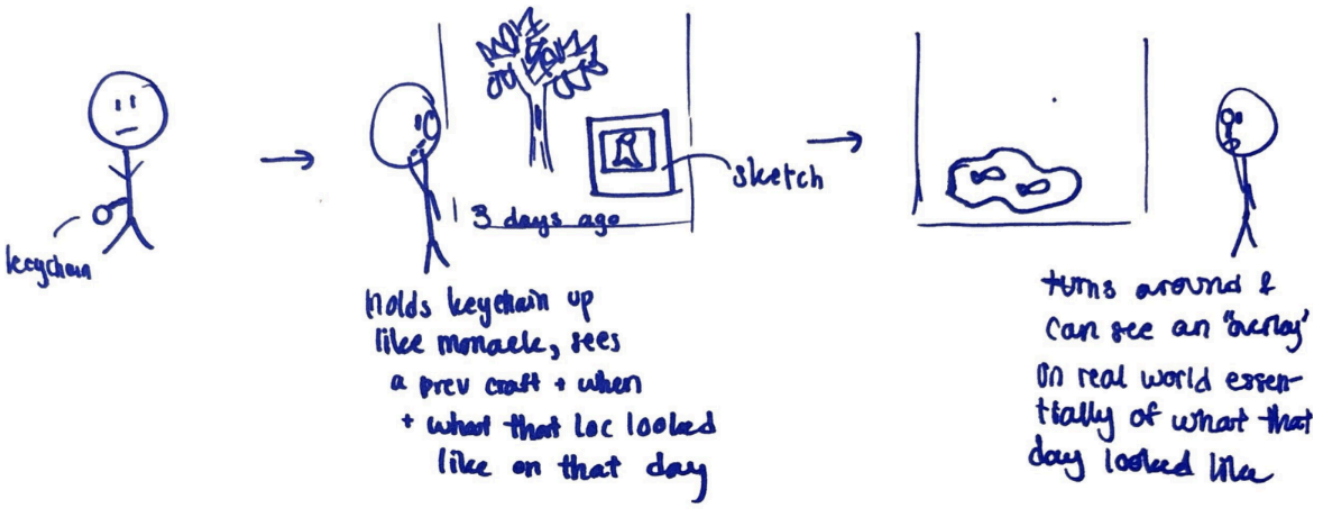
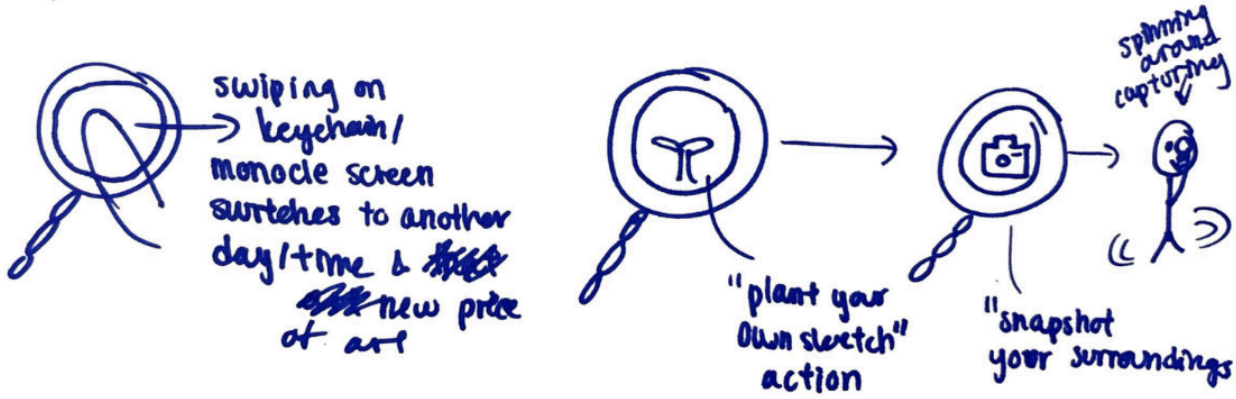
map of art



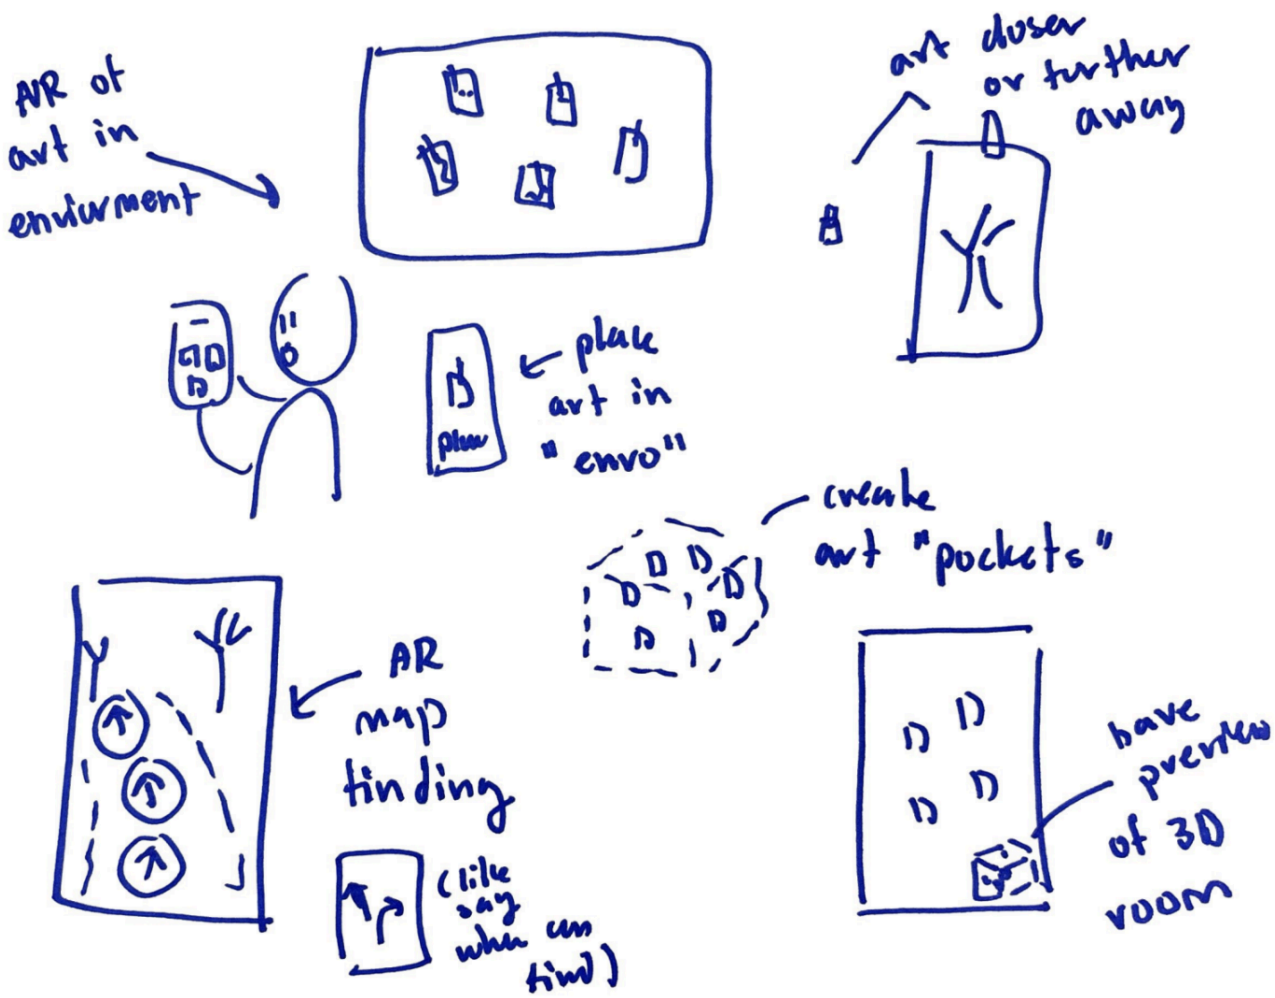
someone drew here
scanning



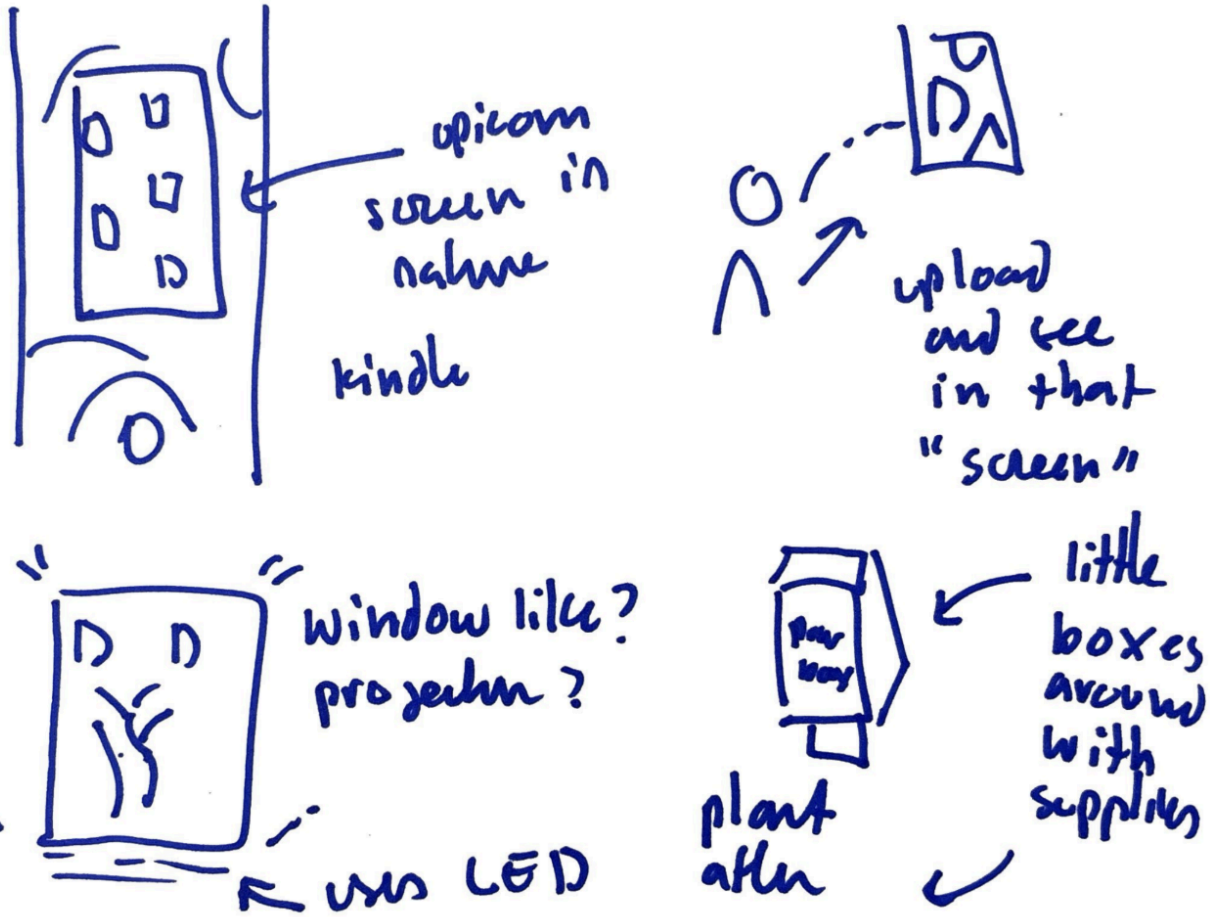
keychain
3 days ago
sketch
holds keychain up like monocle, sees a prev craft + when + what that loc looked like on that day
turns around & can see an 'overlay' on real world essentially of what that day looked like



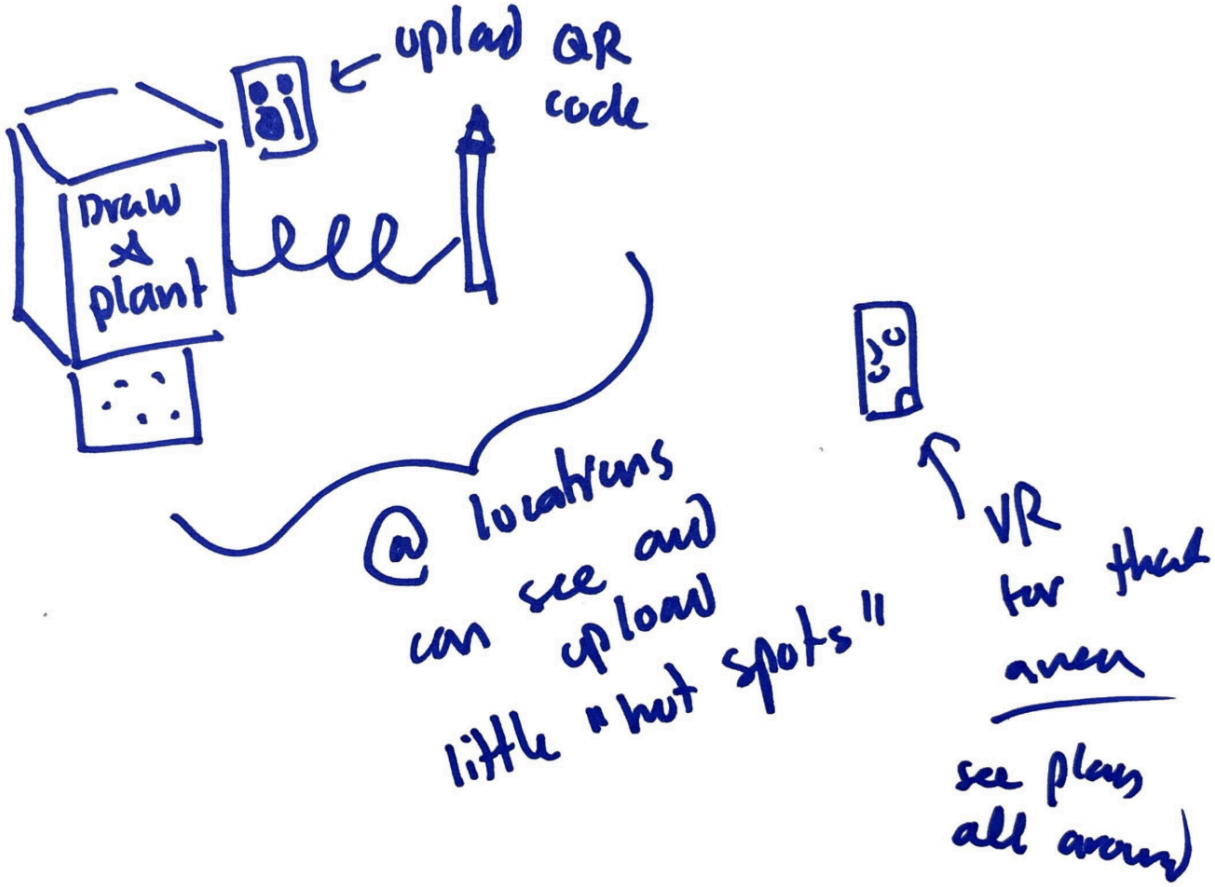
swiping on keychain/ monocle screen switches to another day/time & new price of art
"plant your own sketch" action
spinning around capturing
"snapshot your surroundings"



AR of art in environment
art closer or further away
place art in "envo"
create art "pockets"
AR map finding
(like say when can find)
have preview of 3D room



upicom screen in nature
kindle
upload and see in that "screen"
window like? projection?
uses LED
little boxes around with supplies
plant attn



upload QR code
Draw a plant
@ locations can see and upload little "hot spots"
VR for that area
see plans all around

Appendix

LINK TO ALL SKETCHES

1. Initial Brainstorming (Pages 40–44)

Early concept sketches exploring different approaches to creative inspiration, including wearables, AR, physical objects, and phone-based interactions.

2. Three Distinct Realizations (Pages 45–64)

Concept sketches exploring three modalities:
- Headphones / Smart Watch
- Monocle / Keychain with AR
- Phone App / Widget / Lock Screen

3. Two Fleshed-Out Realizations (Pages 65–72)

Detailed sketches exploring the interactions and screen transitions for our two selected realizations:
- Smart Watch (Pages 65–66, 71–72)
- Phone App (Pages 67–70)

4. Low-Fidelity Prototype Construction (Pages 73–75)

Photographs documenting the construction of our paper prototype, including the use of sticky notes, layered paper screens, and movable interface elements.

5. Phone Interface Exploration and Prototype Screens (Pages 76–91)

Additional phone interface sketches (Pages 76–79) and detailed paper prototype screens (Pages 80–91), including artwork capture, privacy options, galleries, and audio reflections.

6. Three Task Flows (Pages 92–94)

- Simple — Discover Inspiration (Page 92): Find nearby artwork and choose a creative location.
- Moderate — Create and Save/Share (Page 93): Capture artwork and choose how to save or share it.
- Complex — Revisit and Connect (Page 94): Return to saved work and reflections to find inspiration for a main craft.
